

COMMERCIAL & BUILDERS

Your building, lit every night of the year. Booked once.

Permanent roofline lighting, controlled from one app: brand colours every evening, the holidays without hiring a crew every fall.

Red and white for Canada Day on a commercial building

Storefronts, plazas and offices

- **Brand colours on demand.** Your colours on weeknights, the holidays in season, a promotion colour for a sale weekend.
- **No seasonal contract.** Our commercial seasonal accounts typically spend \$3,500 to \$10,000 every season on install and take-down. Permanent is paid once.
- **Every site in one app.** Each building gets its own controller and schedule; all of them sit under one account.
- **Low voltage on an existing outlet** (12 V, GFCI-protected). No hard-wired circuit for a standard install.

Builders and developers

- **A feature buyers see.** Show homes and listing photos taken at dusk with the roofline lit.
- **One package across a project.** The same track colour, light spacing and controller on every house, priced per house from your plans.
- **Warranty to the homeowner.** The 5-year parts warranty is registered to each address and transfers with the home.
- **Installed after siding and soffit,** typically one house a day, scheduled around your trades.
- **Volume pricing** by the house for subdivisions and multi-unit projects.

Green for St. Patrick's

Warm white, every night

By day the track reads as trim

IP67, -40°C

Sealed and rated for Ontario winters

5 yr / 1 yr

Parts / workmanship warranty

Any month

Install in spring or summer, skip the fall rush

Free walk-through

Measured, colour-matched, quoted in writing

Book a site walk-through

One visit per property. We measure, colour-match and return a written per-site or per-house price.
