

FOREVER LIGHTS

Certificate of Warranty

Every residential and commercial installation completed by Forever Lights is covered by a 5-year parts warranty and a 1-year workmanship warranty, starting on the installation date shown on your invoice.

5 years

Parts warranty

LED points, aluminum track and channel caps, section connectors, low-voltage cable, the power supply and the Wi-Fi controller are covered against defects in materials for five years from installation.

1 year

Workmanship warranty

Any issue arising from how the system was installed, such as a section that comes loose, a connection that was not sealed, or wiring that was not secured, is corrected at no charge for one year from installation.

Lifetime

Phone and remote support

Help with the app, schedules, Wi-Fi re-pairing and remote diagnosis is free for as long as you own the system, whether or not it is still under the parts warranty.

Keep this certificate with your invoice. Replacement parts carry the remainder of the original warranty. If you sell your home, remaining coverage can be transferred to the new owner on request. Full terms: foreverlights.ca/warranty · version 2026.09

Caring for your system

The short version: there is almost nothing to do. The track and lights are IP67 sealed and rated to -40°C , so snow, ice and rain are normal operating conditions. Nothing comes down for winter.

WHEN	FIVE-MINUTE CHECK
Every night	Glance at the house from the driveway. If a section is dark, dimmer or the wrong colour, note where it starts and call us.
Spring	Check the power supply and controller are dry and firmly mounted and the outlet cover closes. Run each saved scene once.
Summer	Before any painting, roofing, siding or eavestrough work, tell the contractor there is a lighting track on the eaves.
Fall	Check your schedules and load this year's holiday scenes. Confirm the app still shows the controller online.
After a storm	If everything is dark, check the plug, then the GFCI reset button, then the breaker. Storms trip GFCI outlets often.

PLEASE DON'T

- Put a ladder against the track. Anything at roofline height is our job.
- Aim a pressure washer at the track or its joints. A garden hose is fine.
- Hang other decorations from the channel.
- Let anyone else move, cut or add to the system. That ends the warranty on it.
- Unplug the power supply to run a leaf blower and forget it.

COVERED

- LED point failures due to manufacturing defects, including individual dark points and dark sections
- Track, channel cap and mounting hardware defects, including finish delamination
- Power supply and transformer failures
- Wi-Fi controller failures, including a controller that will no longer pair or hold settings
- Connector and low-voltage cable defects

MAKING A CLAIM

1. Call (519) 914-3404 (or use the contact form on our website) and tell us what you are seeing and where on the home it starts.
2. Have your installation date or invoice number handy so we can pull up your system.
3. We diagnose remotely first. Many controller and app issues are resolved on the phone the same day.
4. If a visit is needed we book it, usually within a week outside of December. Our crew brings the lift and the parts.
5. Defective parts are replaced and tested at no charge. You receive a short service note for your records.

NOT COVERED

- Damage caused by other contractors
- Physical damage from impact, vandalism, fire, flood, falling trees or limbs, or animals chewing cable
- Damage from power surges or lightning where the outlet was not GFCI-protected
- Systems or sections modified, moved, repaired or added to by anyone other than Forever Lights
- Normal cosmetic wear, such as gradual fading of the channel finish, that does not affect the lights
